Experience

National Teaching Council - Data Engineer (Contract)

National Teaching Council is a government agency established to regulate the teaching profession in Ghana.

2022 – 2025

Greater Accra, Ghana

- > Designed and deployed a **production ETL pipeline** using AWS Glue to extract data from PostgreSQL and load into Amazon Redshift for nationwide analytics.
- > Built scalable staging and transformation layers, converting transactional data into a star schema warehouse model optimized for analytical workloads.
- > Optimized Redshift performance using **distribution styles and sort keys**, reducing data movement and improving query performance up to 50%
- > Developed **batch processing pipelines** to handle large scale datasets supporting analytics across **500,000+** users.
- > Implemented **data quality checks, validation pipelines and monitoring**, ensuring reliability of downstream analytics and reporting systems
- > Enabled **analytics-ready datasets and feature inputs** for reporting and data-driven decision-making.

KPMG Sweden - Data & Process Automation (System Specialist)

KPMG is a leading provider of professional services in Sweden

2023 – Present

Stockholm, Sweden

- > Develop enterprise solutions with Microsoft Power Platform and collaborate with stakeholders to digitize workflows and improve operational reporting.
- > Develop enterprise solutions using Microsoft Power Platform (Power Apps, Power Automate, and Power BI).
- > Built business dashboards and reports supporting operational and risk management decisions.
- > Automated business processes using Power Automate, reducing manual effort and improving operational efficiency.
- > Collaborated with business stakeholders to digitize workflows and improve reporting.

Software Skills

Understanding of: Data Modeling, ETL/ELT Pipelines, Data Warehousing, Lakehouse Architecture, Functional Programming, OOP, Unit and Functional Testing, Debugging, Teamwork, Problem solving

Experience with: Python, Apache Airflow, Apache Spark, SQL, PostgreSQL, MongoDB, AWS (S3, Glue, Redshift, Athena), Elasticsearch, Redis, REST, Docker, CI/CD, Scrum, Kanban

Projects

STEDI Data Lakehouse - Built AWS lakehouse (S3, Glue, Athena, Spark) for ML-ready data processing

Airflow Pipelines - Designed dynamic pipelines with orchestration and data quality checks

Redshift Warehouse - Built optimized star schema warehouse from raw JSON datasets

Education

Uppsala University

MSc Data Science

2022 – 2024

Uppsala, Sweden

University of Ghana

BSc Computer Engineering

2013 – 2017

Accra, Ghana
